

# Release Notes - July 29, 2019

Published on 01/27/2022

## New Features

### Business Days

Ever had a task pop up as due on a Saturday, or needed to block off a day for a team offsite? Now with **Business Days** (<https://lytho.knowledgeowl.com/help/business-days>), you can define which days are available for your team's schedule. Once enabled, your requesters can better accommodate your team's schedule, and cycle time reporting paints a more accurate picture of team productivity.

The screenshot shows a 'Due Date' modal window. At the top, it says 'Due Date' with a close 'X' button. Below is a calendar for 'July 2019'. The days of the week are listed as Sun, Mon, Tue, Wed, Thu, Fri, Sat. The calendar grid shows dates from 30 (previous month) to 10 (next month). The 18th is highlighted in green. A mouse cursor is hovering over the 26th. At the bottom right, there is a green 'Save' button.

### SSO for Adobe Extensions

Extend the ease of accessing all your applications with Single Sign-On for the inMotion Extension for Adobe Creative Cloud! If your team uses SSO, you can now leverage the inMotion Adobe Extensions for Photoshop, Indesign, and Illustrator to spend more time in Creative Cloud as you complete and route work for review. Learn how to install the inMotion Adobe Extension [here](https://lytho.knowledgeowl.com/help/install-adobe-extension)

(<https://lytho.knowledgeowl.com/help/install-adobe-extension>).

## Improvements

- Reports can now be duplicated.
- Additional date filters added to reports and custom views include: *Tomorrow*, *This Week*, *This Month*.
- *Email Address* field has been added in the User report.
- See *Next Incomplete Item Due* in Project reports and custom views as a new column.
- Project statuses can now be changed in project templates.
