

# Release Notes - September 16, 2019

Published on 01/27/2022

## New Features

### Dependencies

With [Dependencies](https://lytho.knowledgeowl.com/help/dependencies) (<https://lytho.knowledgeowl.com/help/dependencies>), you can ensure that work is completed in the correct order by identifying dependent relationships between work items in the same project or campaign. Keep your team focused on current work by hiding blocked work from their views, and alert team members when new work is ready for them with in-app and email notifications that send automatically when a blocker is completed.
