

# Release Notes 1.12.0

Published on 01/27/2022

## New Features

### Dashboard

Real-time insights at your fingertips! Team Members will now see a Dashboard home page when logging in, highlighting the most relevant requests, projects, work, and reviews on their to-do list. Care more about the bigger picture? Toggle between “My Work” and “All Work” to see a bird’s eye view of your account!

### Single Sign-On (SSO)

Concerned about security? Accounts now have the option to enable [Single Sign-on \(SSO\)](https://lytho.knowledgeowl.com/help/user-authentication) (<https://lytho.knowledgeowl.com/help/user-authentication>), which seamlessly integrates your account with your company's directory! You can control exactly who is allowed in and how your users authenticate. If you're interested in enabling this feature in your account, [contact our Customer Success Team](http://guide-beta.inmotionnow.com/help/contact-feedback). (<http://guide-beta.inmotionnow.com/help/contact-feedback>)

### Enhanced Project Creation

Get from the request to project work even faster! Request forms can now be associated to specific tags and project templates, streamlining project creation. [Contact our Customer Success team](http://guide-beta.inmotionnow.com/help/contact-feedback) (<http://guide-beta.inmotionnow.com/help/contact-feedback>) to discuss automatically associating tags or project templates to any of your custom request forms! [Learn more!](https://lytho.knowledgeowl.com/help/enhanced-project-creation) (<https://lytho.knowledgeowl.com/help/enhanced-project-creation>)

### Improvements

- Forms can now include multi-select options

### Design Direction
