

Release Notes - August 22, 2020

Published on 01/27/2022

New Features

Data Warehouse*

With this add-on feature you can combine your inMotion ignite data with the rest of your organization's operational metrics in your preferred Business Intelligence platform for increased automation, customization, and visualization of all your data to clearly show the impact that creative work has on meeting key business objectives. Learn more about adding Data Warehouse for inMotion ignite to your subscription by [scheduling a call](https://calendly.com/tcoleyinmotionnow/data-warehouse-for-ignite) (<https://calendly.com/tcoleyinmotionnow/data-warehouse-for-ignite>) with our Sales Team!

* Data Warehouse for inMotion ignite is available for Business and Enterprise customers.

Improvements

Next Incomplete Item Reporting

Project [custom views](https://guide-ignite.inmotionnow.com/help/custom-views) (<https://guide-ignite.inmotionnow.com/help/custom-views>) & [reports](https://guide-ignite.inmotionnow.com/help/reporting-work-reports#projects-report-available-columns-filters) (<https://guide-ignite.inmotionnow.com/help/reporting-work-reports#projects-report-available-columns-filters>) now have an additional data point to leverage, the Next Incomplete Item Due Date. When paired with the Next Incomplete Item, you'll be able to provide even better macro-level insights into what needs to be tackled next and which projects might be at risk.
