# Release Notes - January 11, 2021
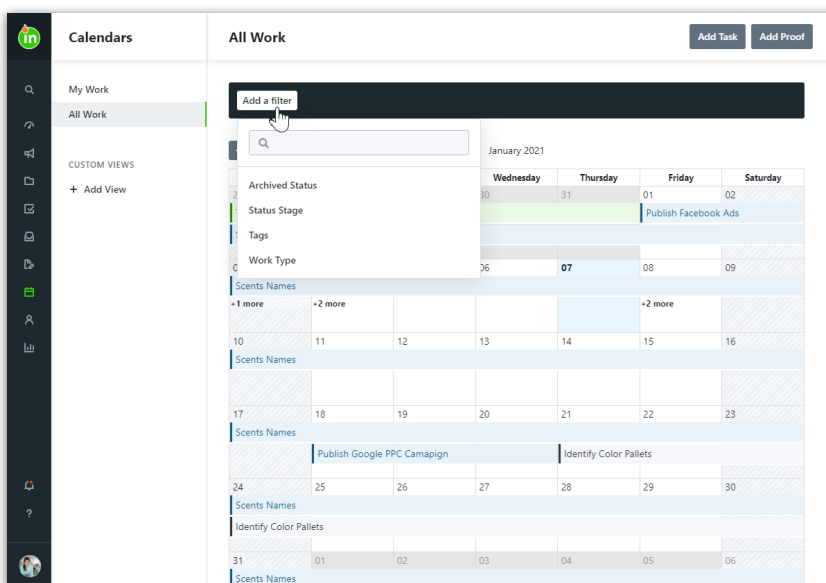

Published on 01/27/2022

New Features

Create, Edit, and Manage Your Own Forms!

The Form Template Builder (https://guide-ignite.inmotionnow.com/help/an-introduction-to-form-template-builder) is intuitive, allowing you to build and update your own forms quickly. Drag and drop functionality makes it easy to add and organize fields and a wide variety of options ensures you can gather the requirements you need for full alignment. Hop over to Templates > Forms to get started on your own request creations!

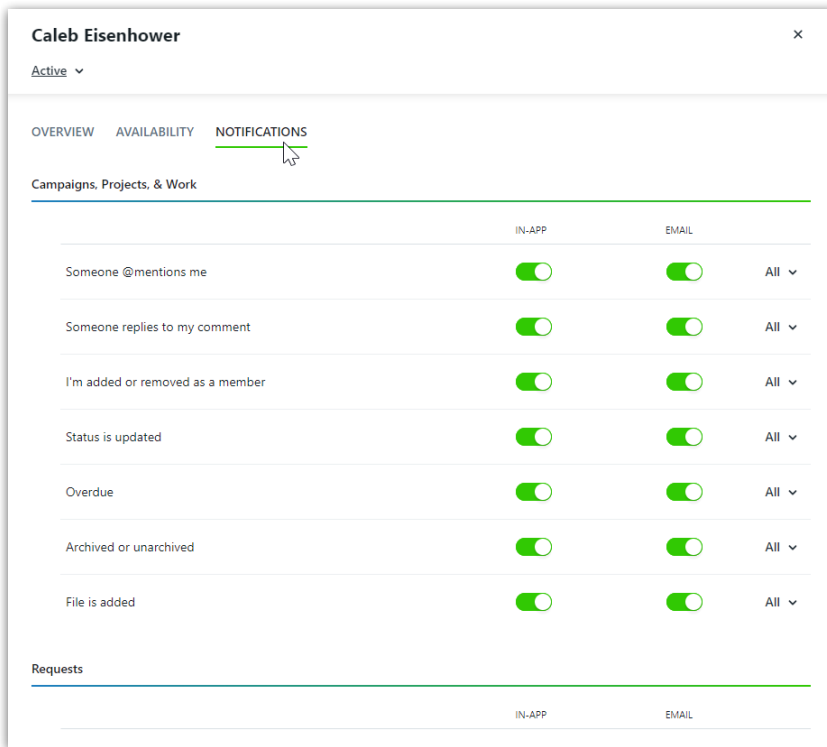

Create the Calendar That Will Help Keep Your Team On Track!

Now in Calendars (https://guide-ignite.inmotionnow.com/help/calendars-views) you can filter by users, tags, status, and more to see the dates that matter for your ongoing cross-channel, multi-campaign initiatives. Build and save multiple custom calendar views to quickly switch between the tasks and deliverables you need eyes on. Think: Team Calendars, Content Calendars, Customer Communication Calendars, Brand Calendars, Social Launch Calendars, and so much more!
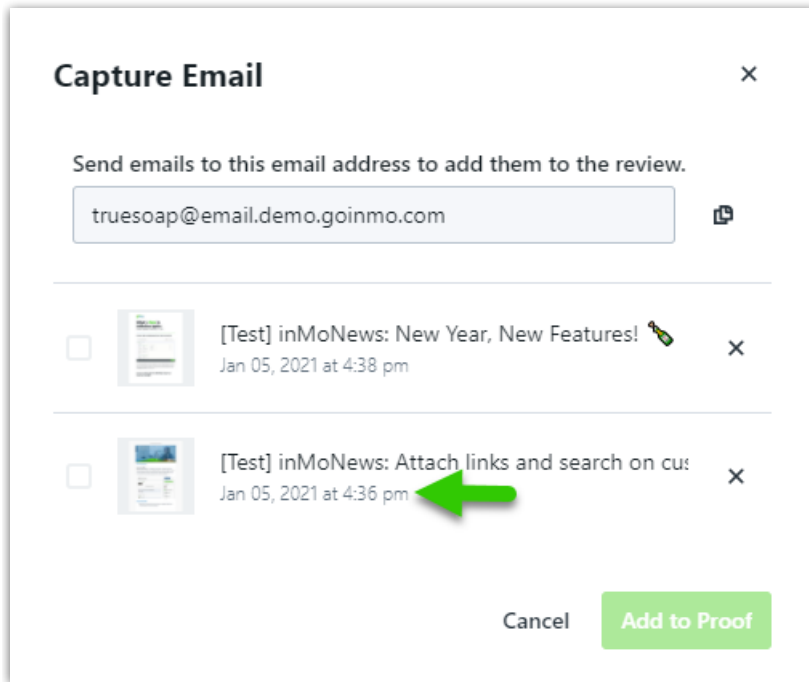

Improvements

- Manage the notifications settings of your users directly from the People Page. This is especially helpful when assisting your team with notification questions and helping them enable settings like email digests!

- Additionally, it is now easier to find users on the People page sorted first by user status and then alphabetically.

- Email review assets will now show the date they were received when being added to a review, making it easy to know which asset to upload.

- A new column, Invited By, is now in the Users Report.

Feeling nostalgic? Here's what we released...

- **Six months ago** (https://guide-ignite.inmotionnow.com/help/release-notes-6-15-2020)
- **One year ago** (https://guide-ignite.inmotionnow.com/help/release-notes-1-13-2020)
- **Eighteen months ago** (https://guide-ignite.inmotionnow.com/help/release-notes-07-07-2019)
- **Two years ago** (https://guide-ignite.inmotionnow.com/help/release-notes-1-20-0)
