Release Notes - April 19, 2021
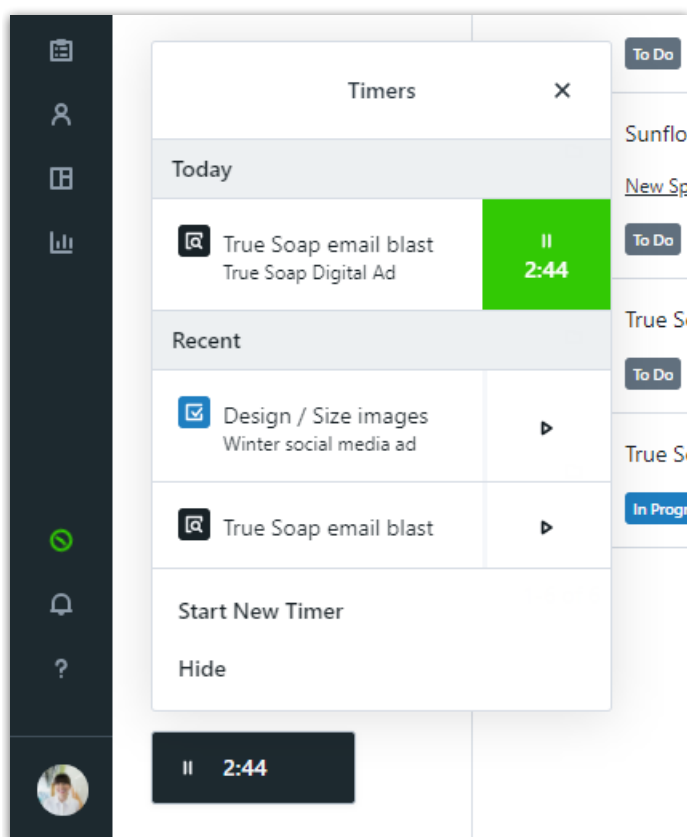

Published on 01/27/2022

New Features

Timers*

Tracked time is an incredibly useful data point for identifying bottlenecks and understanding how long your team's projects truly take. This week we're introducing Timers (https://guide-ignite.inmotionnow.com/help/timers) - the most convenient and precise way to keep track of time spent completing each task and proof. Start, pause, and stop timers from wherever you are in ignite - including your Dashboard, List views, and the Global Nav Bar!
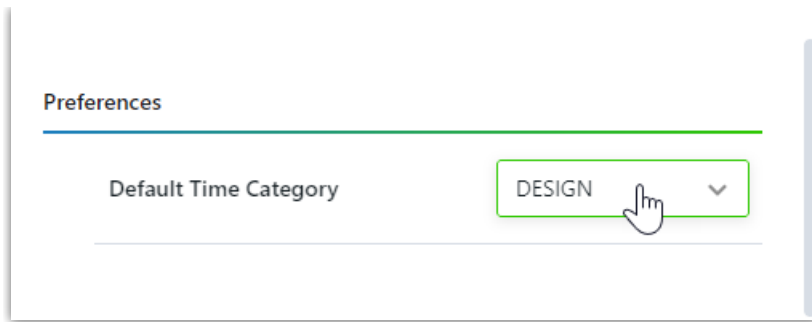

Available Only to Business and Enterprise Customers

Improvements

Set a Default Time Category

Admins love using Time Categories to help crunch the data, but it can be a pain if the category you select most often is low on the list. Now you can save time categorizing your time tracking entries by setting a default category (https://guide-ignite.inmotionnow.com/help/profile-management#preferences) in your Personal Settings.

Available Only to Business and Enterprise Customers

Track Your Review Deadline Times

Time is now included in the Review Deadline column in custom views and reports.

Feeling nostalgic? Here's what we released...

- **Six months ago: Quick Start Reporting** (https://guide-ignite.inmotionnow.com/help/release-notes-10-19-2020)
