# Release Notes - February 22, 2021
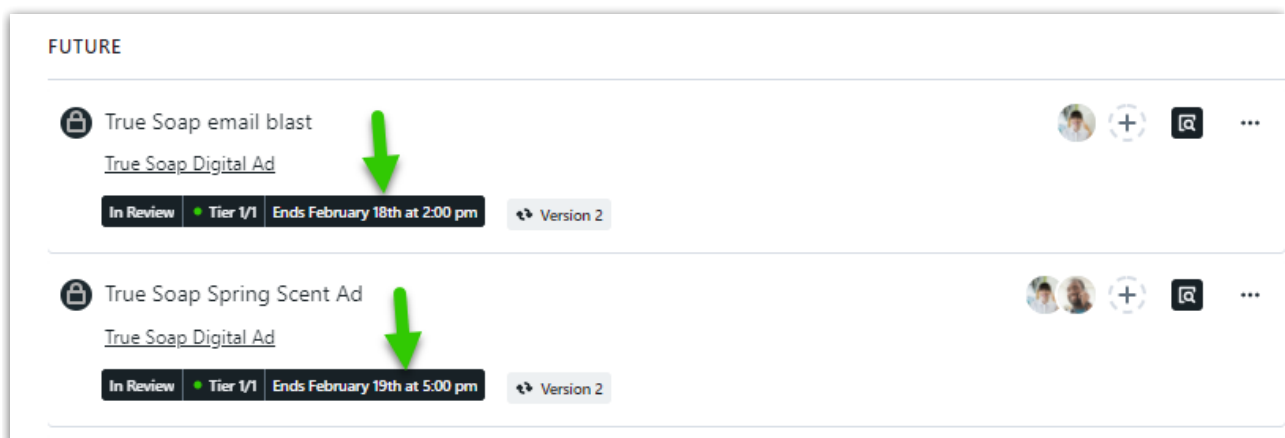

Published on 01/27/2022

Improvements

- Want to restart your Auto-Numbering (https://guide-ignite.inmotionnow.com/help/auto-numbering) sequence at the beginning of a new year, quarter, or month? Now you can reset your sequence and reuse numbers for projects, campaigns, and requests.

- Easily see exactly when review routes are going to end with review deadline (https://guide-ignite.inmotionnow.com/help/editing-proof-details#review-deadline) due times, now visible in the Work list views and My Reviews page.

- Find what you're looking for faster! Global search now returns 50 results at a time.

Feeling nostalgic? Here's what we released...

- **Six months ago: Enhanced Notification Management**
- **One year ago: Pinned & Required Custom Fields**
- **Eighteen months ago: Designer Checklists and the Ability to Decline Requests**
- **Two years ago: The Users Report**
