

Release Notes - March 8, 2021

Published on 01/27/2022

Improvements

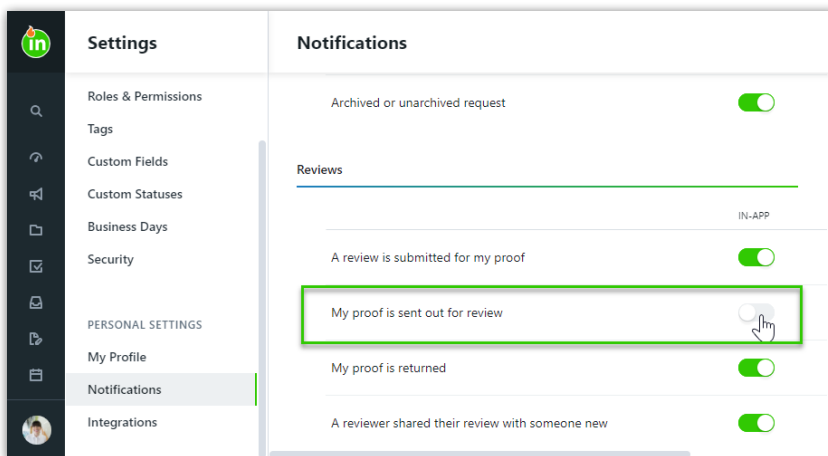

More Freedom with Tags

- Manage [Tags](https://guide-ignite.inmotionnow.com/help/managing-tags) more easily by merging them within your Account Settings.

Get Notified About Things Important to You

- Keep tabs on all of your proofs with the new option to notify members of a proof when it is sent for review. Hop over to [Notifications](https://guide-ignite.inmotionnow.com/help/notifications) in your Personal Settings to enable this!

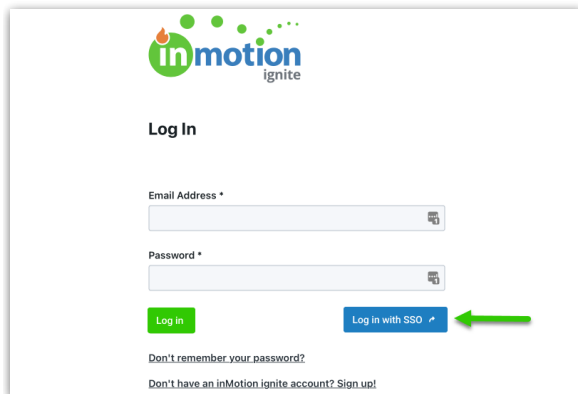

Include the Value for Day in your Auto-Naming Formula

- [Auto-Naming](https://guide-ignite.inmotionnow.com/help/auto-naming) helps ensure consistency and

automates the manual naming process. We have added even more date options for you to fine tune your Auto-Naming formula to include variables related to the creation date, start date, and due date of your work.

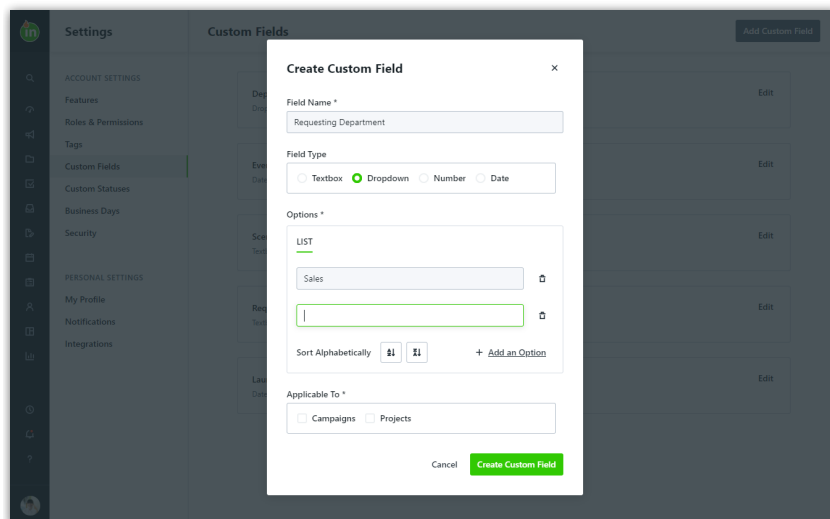

A Better Experience with SSO

- Logging in with Mixed SSO (<https://guide-ignite.inmotionnow.com/help/user-authentication>)? Your users will notice the login with SSO button is now more visible for an improved login experience.

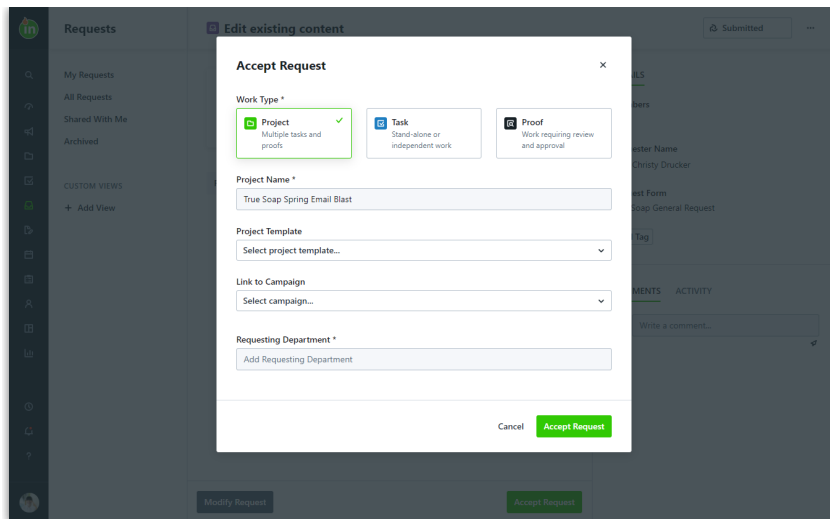

Quality of Life Improvements

- Custom Field drop-down list options can now be added in the create modal.

- The Accept Request Modal now boasts a new look with descriptive language and work icons.

Additional Improvements

- Work and Proof reports “Created Date” column now displays the proof creation date instead of the created date of the most recent version of that proof.
- Now you can share a proof and require a user's review even after they've been @mentioned in the review.

Feeling nostalgic? Here's what we released...

- **Six months ago: New Ways to View Work** (<https://guide-ignite.inmotionnow.com/help/release-notes-9-5-2020>)
