# Release Notes - August 16, 2021

Published on 01/27/2022

Improvements

Move Work Groups to Other Projects

- Now you can move entire work groups (https://guide-ignite.inmotionnow.com/help/work-groups#move-work-groups-to-other-projects) to existing projects, giving you more freedom to quickly build and edit projects.

New Ways to Filter in your Request Custom Views

- Easily organize and track your requests and the requests of your team with a new filter for "Request Members" on request custom views and reports. Additionally, a new filter and column "Request Shared With" has been added to easily filter and view who requests have been shared with.

Better Delivery for your Deliverables

- Close the loop with requesters and make final deliverables more apparent! When a request is completed, requesters will receive an email notification listing all of the deliverables available on the request. Additionally, requesters and request members will get a notification when a deliverable is made available, even if the project isn't completed yet.

Additional Improvements

- Filter your list of campaigns by status stage with the new "Campaign Status Stage" filter for campaign custom views and reports. Status stages include "To Do," "In Progress," and "Completed."

Feeling nostalgic? Here's what we released...

- **Six months ago: Improvements to Auto-Numbering** (https://guide-ignite.inmotionnow.com/help/release-notes-2-22-2021)

- **One year ago: Data Warehouse** (https://guide-ignite.inmotionnow.com/help/release-notes-8-22-2020)

- **Eighteen months ago: Require & Pin Custom Fields** (https://guide-ignite.inmotionnow.com/help/release-notes-2-24-2020)

- **Two years ago: Designer Checklist** (https://guide-ignite.inmotionnow.com/help/release-notes-08-19-2019)
