

Content Block Tools

Published on 05/17/2022

A brand guide consists of pages and blocks. Each page can contain multiple blocks with different kinds of content. A block can contain six different types of content:

Text

The Text block allows you to create blocks of text and formatting tools are found in the bar above the text box.

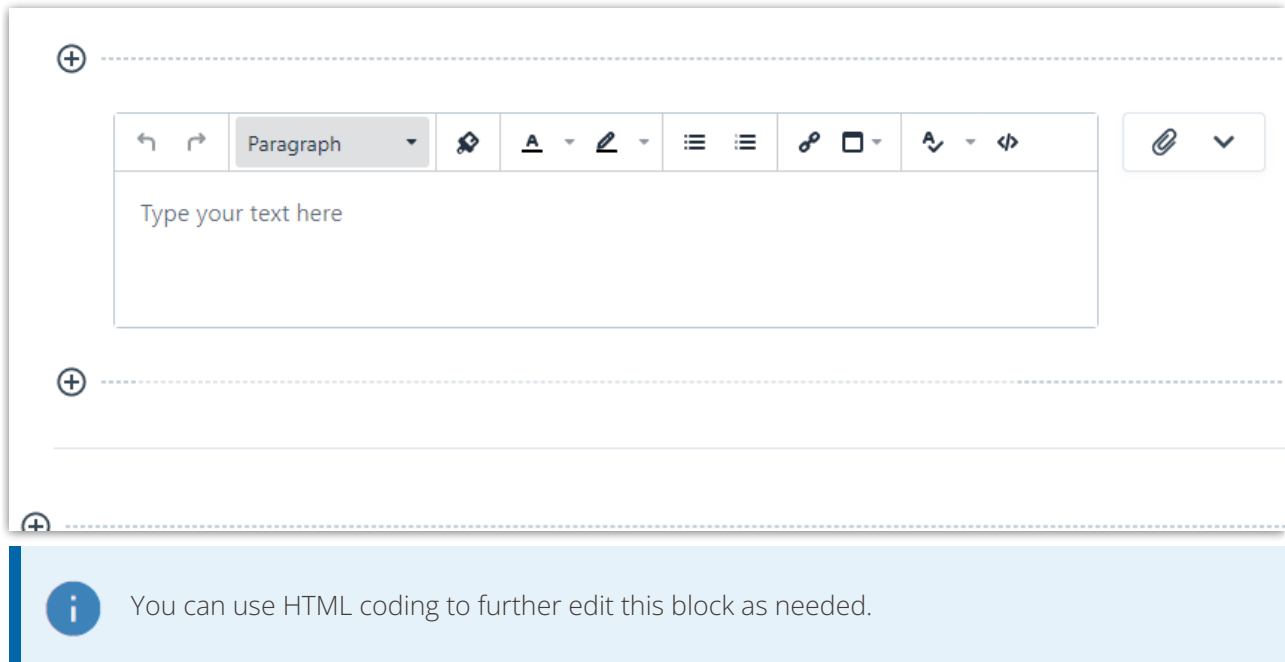

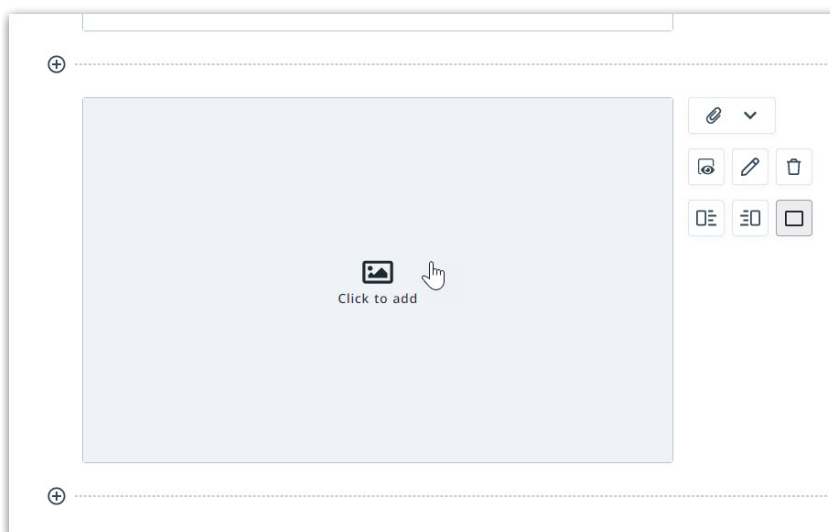

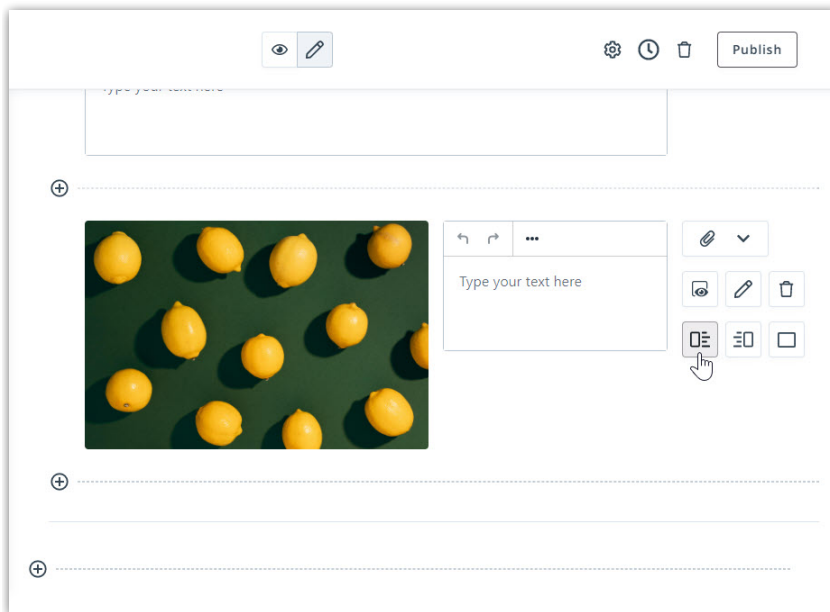

Image & Video

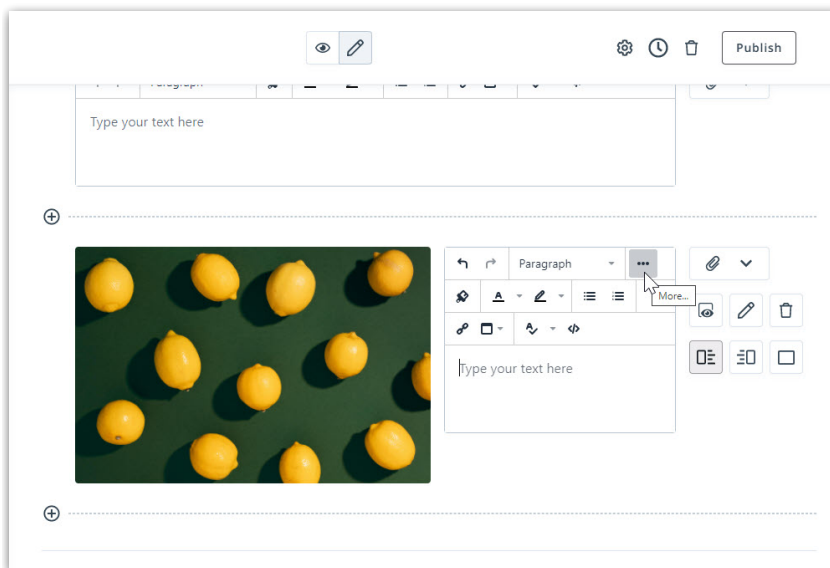

Both the Image and Video blocks allow you to upload an image or video directly from the DAM or from a local file.

Additional options on the right side of your block allow you to add text to the left or right side of your image or video.

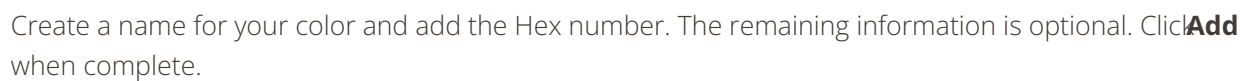

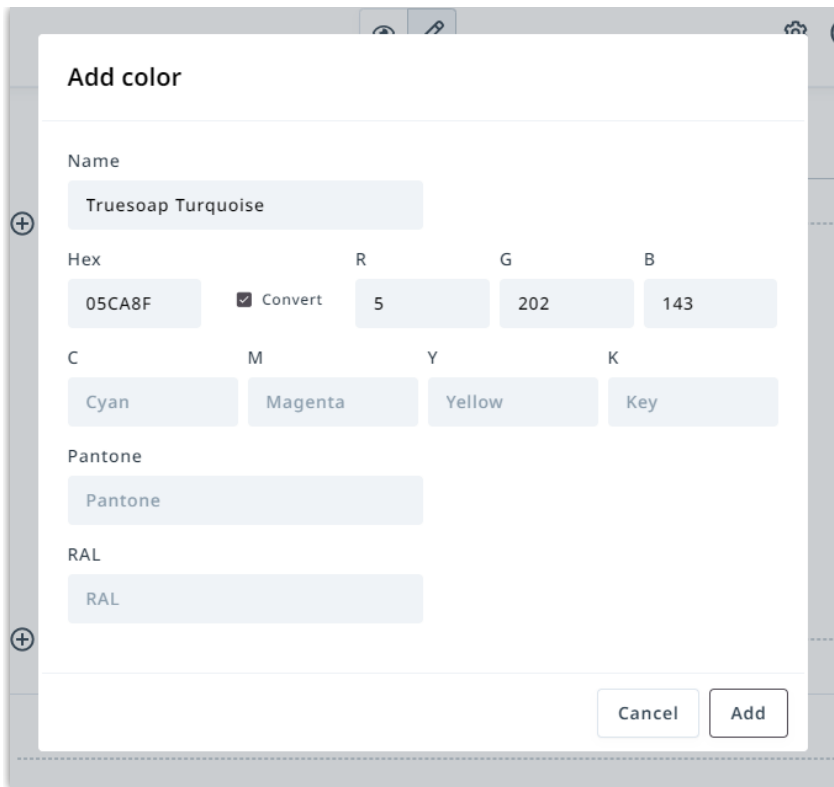

Click the actions menu at the top of the text box to reveal formatting options.

Adjust the size of your images within the **Edit block** modal. Input the width in percentages and click **Save**.

The colours block allows you to insert your brand colors for your users to easily view and copy. Click into the box to begin adding a color.

Cancel Add

Multiple colors can be added to a block by selecting **Click to add**.

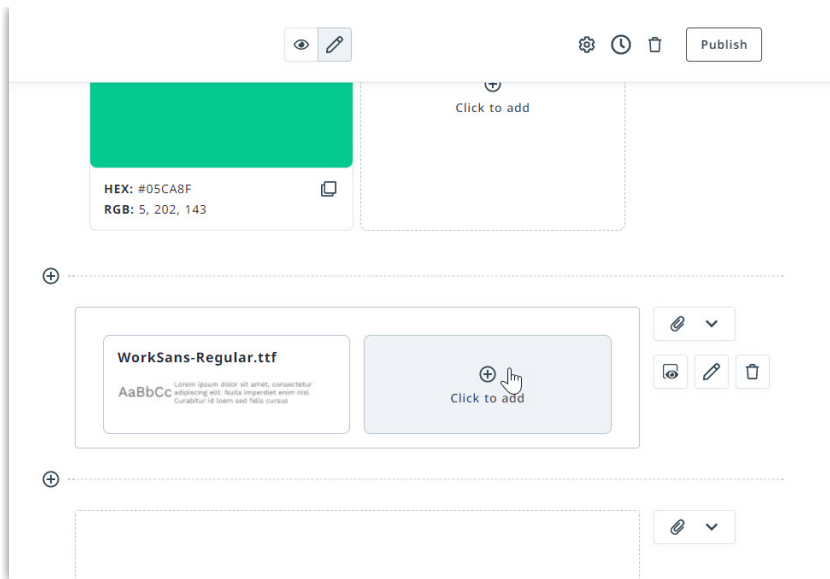

Typography block editor showing a block with a background image of lemons. The block contains a color swatch for 'Truesoap Turquoise' with the following details:

- HEX: #05CA8F
- RGB: 5, 202, 143

A 'Click to add' button is visible next to the color swatch, indicating that multiple colors can be added to the block.

Typography

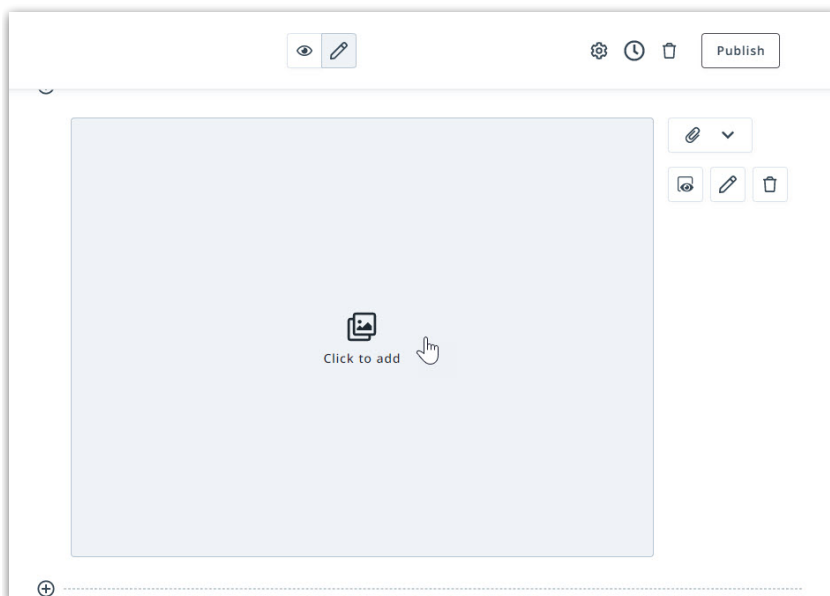

The typography block allows you to upload a font file. The file name will be reflected as the font name. Add multiple fonts to your block by selecting **Click to add**.

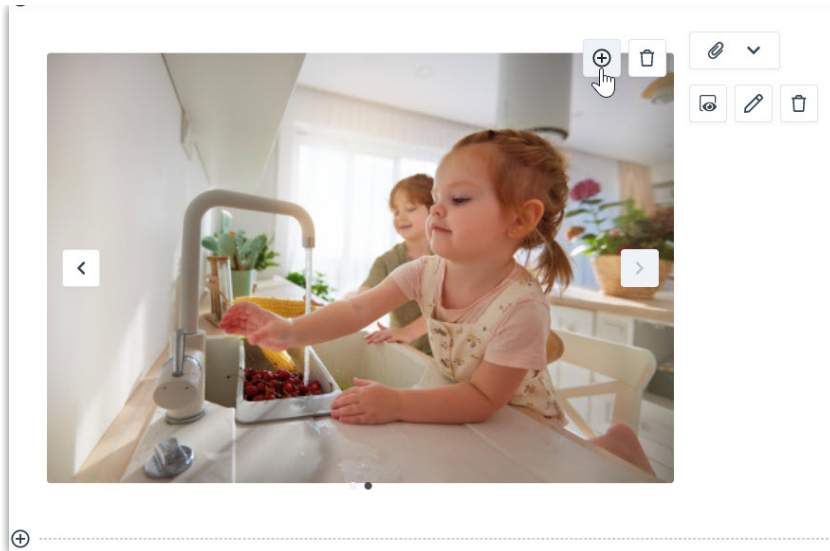

Font files are not downloadable unless added as an attachment as well.

Gallery

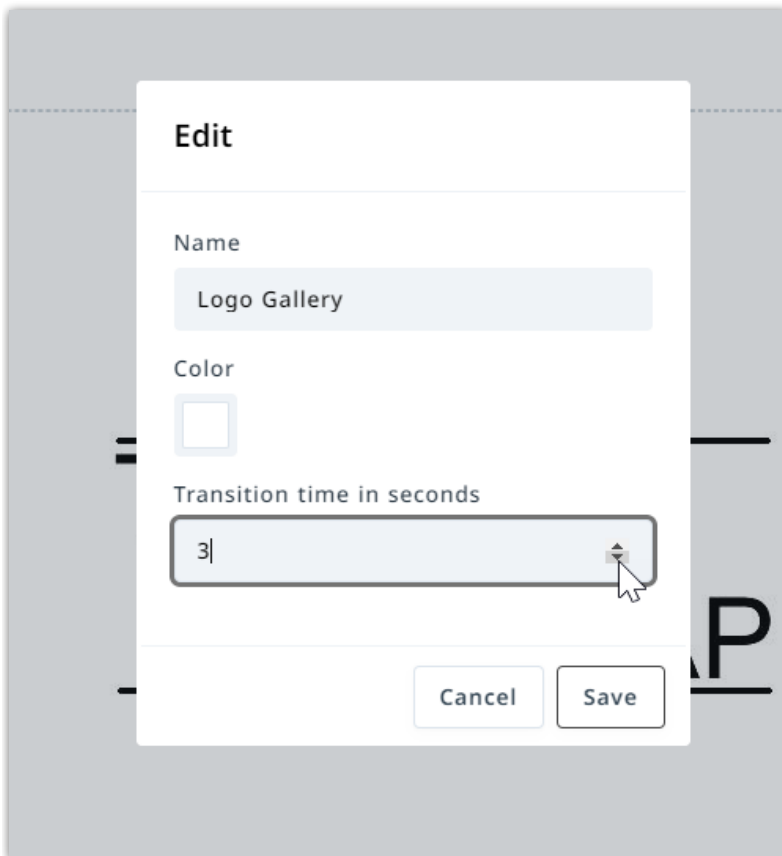

The Gallery block allows you to add multiple images that can be viewed in a slide-show fashion on a 3 second timer. Click to add your first image.

Continue adding images using the plus icon in the top right corner. Delete the current image using the trash icon.

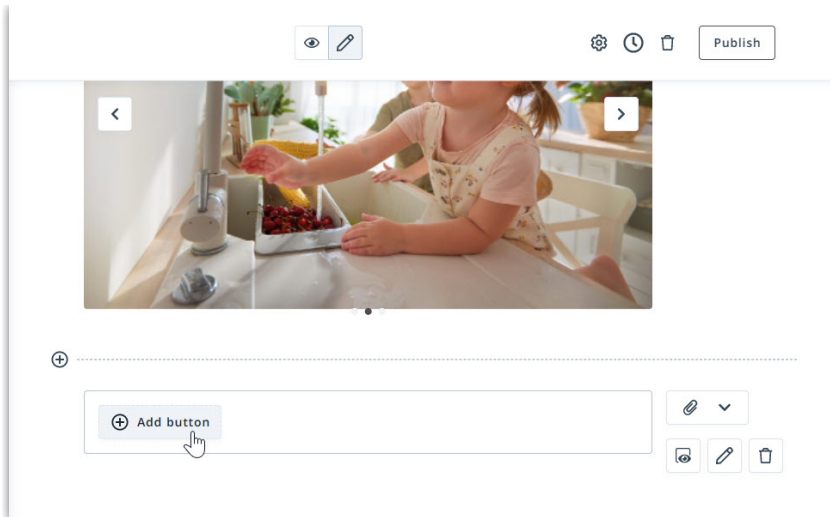

Adjust the image transition time within the **Edit block** modal. Below **Transition time in seconds**, use the arrows to adjust the time or input the number of seconds desired.

Button

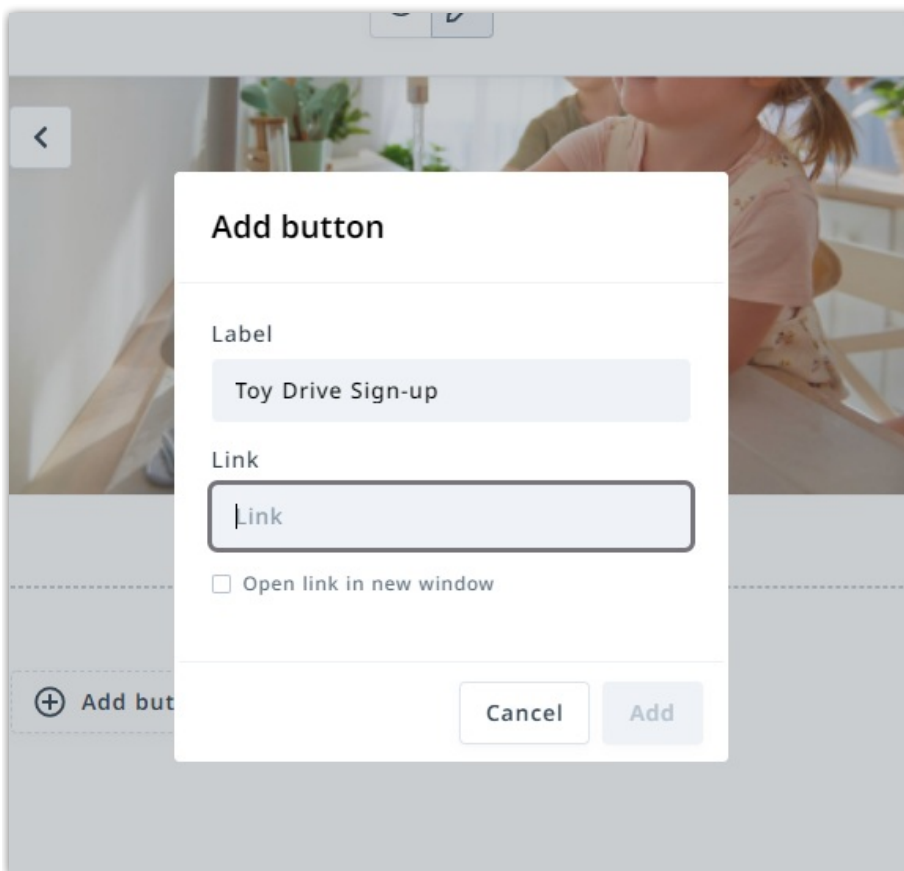

The button block allows you to add a linked button to your brand guide.

Create a label for your button, insert the link, and click **Add** when complete.

Pro tip: Use [Embedded Links](https://guide.lytho.com/help/embedded-links) (<https://guide.lytho.com/help/embedded-links>) to directly link materials and pages within Lytho DAM.
