

Request For Upload

Published on 05/25/2022

The **Request for upload** feature in Lytho DAM is an easy way to ask for assets from users both inside and outside of your organization. This user does not need a Lytho account to send assets to your admin's waiting room for approval.

There are many reasons why you might ask someone to send assets to you. Let's take a look at a few scenarios. We'll also see what your users' experience looks like when they receive the **Request for upload** invitation.

Scenario 1

You just had a great event, and your attendees took photos during their experience. Whether the assets are selfies, team photos, action shots, speaker presentations or the entertainment, you would love to be able to use those files to promote your next event.

Scenario 2

You hired a photographer to take photos for a new product launch or promotional materials for a new ad campaign. You need to get those photos from your photographer and upload them to your Asset Manager so your team can use them to create the collateral for the project.

Users with the assigned rule to add and approve assets to the Asset Manager can create and send a request for upload link. The recipients of the link do not have to have DAM access to use the link.

To create the upload request you will need to have the Create upload requests [Rule](https://guide.lytho.com/help/roles#rules) (<https://guide.lytho.com/help/roles#rules>) applied to your [Role](https://guide.lytho.com/help/roles) (<https://guide.lytho.com/help/roles>) under settings.

Creating a Request for Upload Link

Select the upload button  in the top right corner in the Asset Manager or the Waiting Room to begin creating your request.

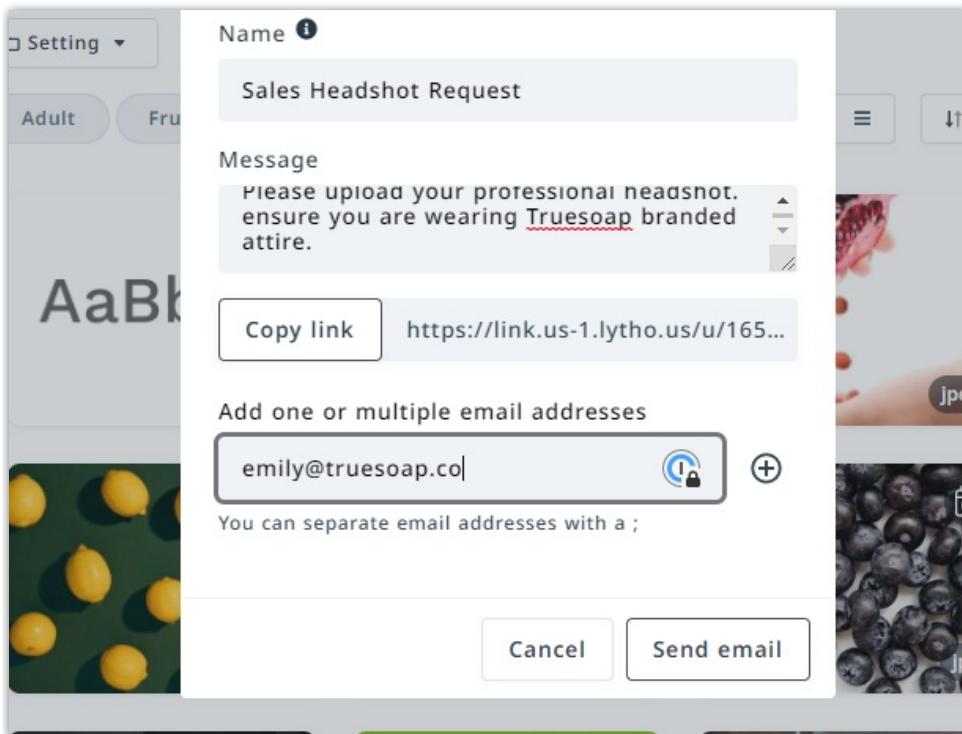

In the **GENERAL** tab select the date the link will be valid through, a name for your link, and a message for your end users. The name is only displayed internally within your shared links for easy management.

You have the ability to add [Tags](https://guide.lytho.com/help/organizing-tags) (<https://guide.lytho.com/help/organizing-tags>) and [Permissions](https://guide.lytho.com/help/permissions-user-groups) (<https://guide.lytho.com/help/permissions-user-groups>) within the additional tabs. This ensures that the assets coming in will have the appropriate tags or permissions applied so that you do not have to apply to each individual asset in the waiting room.

Select **Create link** to create a link that can be copied and shared with your end users. You also have the option to send an email directly from Lytho DAM. Enter the email address(es) in the email field and click **Send email** to send.

The screenshot shows a modal window for sending an email. The 'Name' field contains 'Sales Headshot Request'. The 'Message' field contains 'Please upload your professional headshot. ensure you are wearing Truesoap branded attire.' Below the message is a 'Copy link' button and a URL: 'https://link.us-1.lytho.us/u/165...'. The 'Add one or multiple email addresses' section has a text input field containing 'emily@truesoap.co|' and a plus icon. Below this input is a note: 'You can separate email addresses with a ;'. At the bottom are 'Cancel' and 'Send email' buttons.

When entering more than one email address into the email address box, use a semicolon (;) separator between email addresses with no space.

Example: email1@truesoap.co;email2@truesoap.com

Uploading Assets

If you add user email addresses, they will receive an invitation to upload assets.

Shannon Chapman asked you to upload assets.

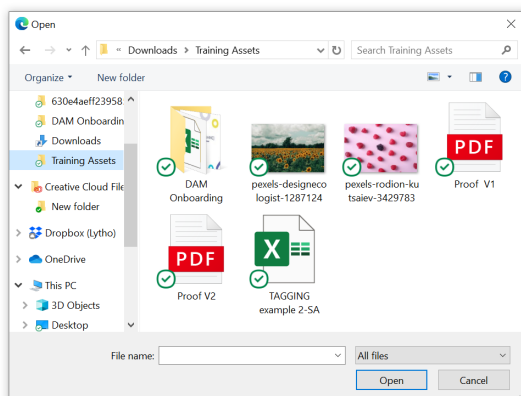

Click on the button below to visit the page where you can upload these assets.

[View page](#)

Kind regards,
The Lytho team!

This is an automated message; please do not reply.

Clicking on the **View Page** button will send the recipient to a web page where they can start uploading assets. Upload assets by either by dragging and dropping files into the designated space or selecting **Upload from computer**.

Your users can continue to upload more assets by clicking on the **Upload more assets** button.

When uploading a large number of assets at a time there may be a wait time before all assets are finalized. Do not refresh the page during this time as this can disrupt the asset upload process.

The final step is for your user is to enter their email before they click on **Send uploaded assets**.

Your email address

shannon.chapman@lytho.com

Send uploaded assets 

If you set an expiration date for the link, it will appear at the top under the Request for Upload information.

Request for upload

Requested by	Uploaded assets
Shannon Chapman	2
Expiration date of this request Apr 2, 2023	

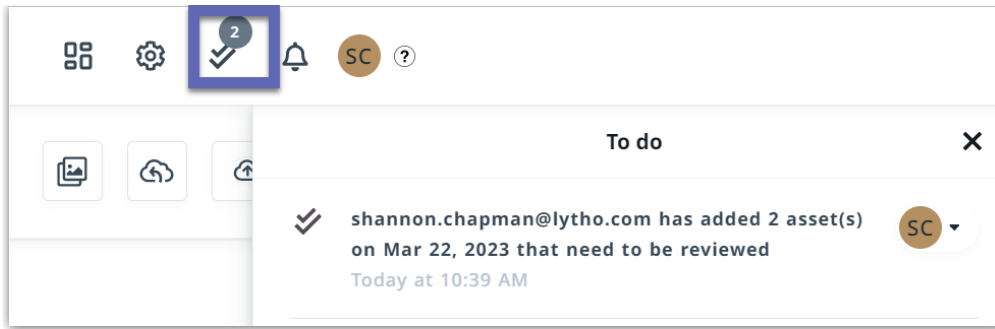

Message

We would love to see the photos you took at our conference this year. Please use the link to upload photos of the event you'd like to share. We might use them for promotional purposes!

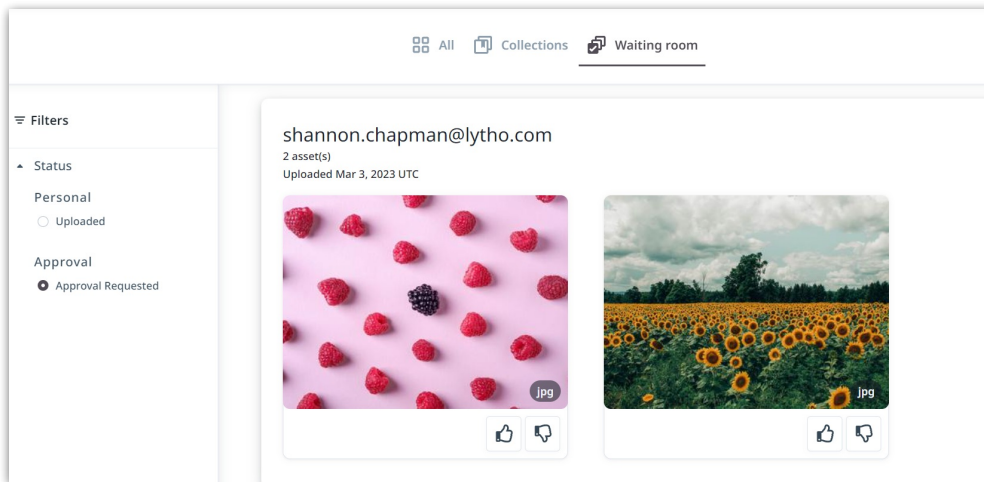

The user can continue to upload assets until the link expires. If an expiration date was not set when the Request for upload was created, the default expiration date is 30 days from when the link was sent.

Approving Assets from the Request for Upload Link

When an asset is uploaded via this link, the "To Do" emblem will light up. A notification will read that an asset has been uploaded via the link. Clicking on the notification will take you into the Waiting Room for your approval.

If you have the ability to approve assets in the [Waiting Room](https://guide.lytho.com/help/uploading-assets#waiting-room) (<https://guide.lytho.com/help/uploading-assets#waiting-room>), you will see them in the **Approval Requested** waiting room.

To have the ability to approve assets to the Asset Manager you will need the Approve assets rule applied to your role under settings.

You can click the **Thumbs Up** to add them to the Asset Manager or select **Thumbs Down** to decline the asset. If you choose to decline the asset you will get a prompt asking you to confirm that you want to decline the asset.

If you are declining multiple assets at one time, you have the opportunity to add a reason for declining.
