# Release Notes - September 12, 2022

Published on 09/01/2022
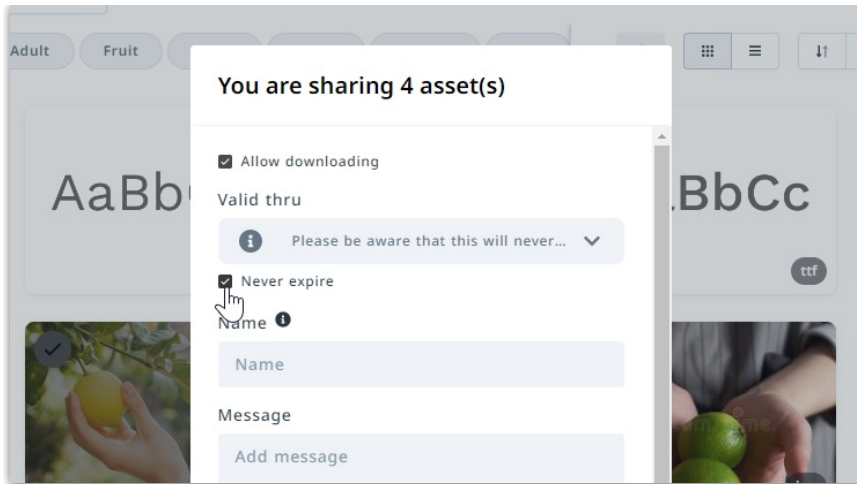

New Features

Easily Revoke Quitclaim Documents

Stay in compliance with Lytho's new Revoke (https://guide.lytho.com/help/quitclaim-documents#revoking-a-quitclaim-document) option for quitclaims. Easily ensure that assets with usage permissions that are no longer valid can't be used and any correlating links expire.

Improvements

Share Links That Never Expire

Users now have more flexibility when sharing assets (https://guide.lytho.com/help/sharing-from-lytho-dam). Assets can now be shared with no expiration date or users can continue to specify a date for tighter protections and compliance.

Using Drupal with Lytho Just Got Better!

The Lytho plugin for Drupal allows you to quickly locate and upload your assets without ever having to leave the application. We have now made uploading assets even easier with the ability to import from Lytho directly on the main media library. **Does your team use Drupal?** Contact us today (https://guide.lytho.com/help/contact-feedback) to learn more about how this plugin can save your team clicks and ensure the right assets are being used every time!

Have a friend who could benefit from Lytho? Refer them and get a $200 gift card!
