# Release Notes - November 14, 2022
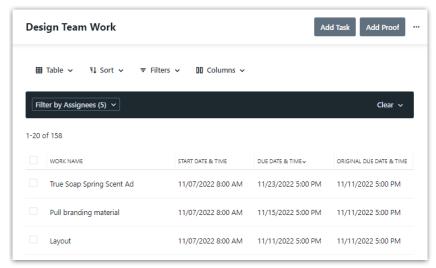

Published on 11/10/2022

Improvements

Filter Workload by Tags

Workload (https://guide.lytho.com/help/resource-management-workload) views allow you to easily view the full scope of what your team has on their plate and better understand when new projects can be added. Now with the ability to filter work items by tags, you can create more customized views that are unique to your organization's needs.

View Original Due Dates

We all know due dates often shift for one reason or another, but it can be important to track those original due dates to gain a better understanding of project scope, expectations, and potential bottlenecks. A new column, **Original Due Date & Time**, can now be displayed in table views (https://guide.lytho.com/help/table-views) for Requests, Campaigns, Projects, and Tasks & Proofs, allowing you to easily view those dates and compare with current dates.

Notifications for Updated Due Dates

Users will now receive in-app and email notifications when a due date has been updated for a work item to which they are assigned, ensuring everyone stays informed of shifting expectations. This can be toggled off within personal notification settings (https://guide.lytho.com/help/notifications#notification-preferences) if desired.

Feeling nostalgic? Here's what we released...

- **Six months ago: Improved Views** (https://guide.lytho.com/help/release-notes-5-2-2022)
- **One year ago: Specialties** (https://guide.lytho.com/help/release-notes-11-1-2021)
- **Eighteen months ago: Timers** (https://guide.lytho.com/help/release-notes-4-19-2021)
- **Two years ago: Automatic Date Calculations** (https://guide.lytho.com/help/release-notes-11-2-2020)
