

# Release Notes - December 14, 2022

Published on 12/12/2022

## Improvements

### Search For Assets By Permission

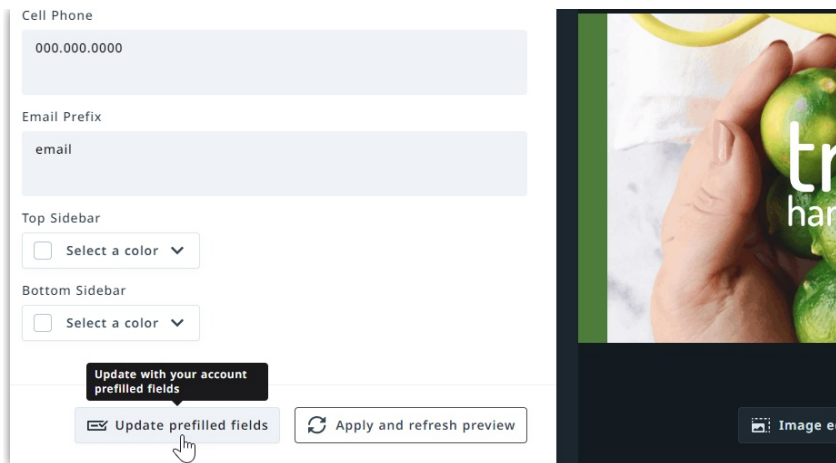

Permissions allow you to give User Groups access to specific assets when restrictions are needed. Now you can easily locate assets assigned a specific permission using the search bar. Similar to Tags, account permissions will automatically populate as you type into the search bar and clicking a permission will provide a view of all assets assigned that permission.

**Update your Adobe plugin** (<https://exchange.adobe.com/apps/cc/104361/lytho-template-builder>) **to access performance improvements to Create & Publish!** Previous versions are no longer compatible and may lead to a poor template creation experience.

### Add your Prefilled Fields to Copied Publications\*

**Prefilled fields** (<https://lytho.knowledgeowl.com/help/prefilled-fields>) allow Users the ability to manage certain field values that are often reused, saving time entering repetitive information and ensuring accuracy. Now when a copy of a publication is shared, the receiver will have the option to update with their own prefilled field values with the click of a button, saving even more time creating publications.

### Link Prefilled fields to Hyperlinks\*

A new option, Prefilled fields, is now available when creating Hyperlink template fields allowing your users to easily link social handles, company websites, and more!

*\*Available to Customers with Create + Publish*
