## **New Features**

## Data Merge for Lytho Tempo

Tempo's (https://www.lytho.com/tempo/) new Data Merge functionality (https://guide.lytho.com/help/an-introduction-to-data-merge) imports data from spreadsheets to auto-populate a Smart Template's variable fields. Now stakeholders can mass produce customized assets without needing designers to adapt the original concept one deliverable at a time.

Transform the way you create, making mass customization simple, efficient, and error-free.
